

Type TM48-VS

Premium combination sauna heater tHERMOS tm48-v-s - Ewald Lang

The exclusive premium sauna heater line thermos-vapo-Superior from the house of Ewald Lang combines the attributes of **Design and power** like no other sauna heater model.

As high-performance electric sauna heaters with a timeless, slim design body, the thermos-bio heaters are perfectly suited for modern Finnish or bio/moisture saunas in the home or business sector.

especially in sauna cabins with large glass surfaces, the Lang electric combination sauna heater functions as a timeless eye-catcher - thanks to its practical, **narrow footprint** it is suitable for both small private saunas (from 5 m³) and medium-sized professional cabins (up to 18 m³). The four visible sides allow free placement in the room - even as a centerpiece.

The Superior models are available in **Metallic** Design in anthracite, stainless steel and white - unique in the entire sauna sector. In addition, the front side has been given a stainless steel application strip, which adds an eye-catching contrast to the unique look. The **Front strip** can be individually provided with advertising labels or similar.

Ewald Lang's proven thermos-vapo-Superior sauna heaters are particularly convincing due to their extremely low heating-up time and very quiet heating-up. This results in a very **environmentally friendly** and **economical** operation.

Optional equipment - thermos bio-S sauna heaters can be expanded in many ways:

- Granitgrid - support in stainless steel: sawn granite strips (4 pieces) placed above the stone basket with a fracture-rough surface
- automatic fresh water filling for Langs evaporator systems via separate inlet in the evaporator tank, with mechanical float valve in the external level tank (btxxH: 170/260 x 100 x 170 mm)
- Herb support with fine sieve made of stainless steel (for dry herbs), instead of aroma support
- Oven railing made of wood - all 4 sides are possible, holder angle made of stainless steel
- Cable cover in chrome steel

technical data - sauna heater tm48-v-s by Ewald Lang

	thermos - type tm 48-V-S
Dimensions w x d x h	48 x 38 x 82 cm
Outer casing	Stainless steel - ground anthracite metallic glaze white gloss glaze
Head frame	Stainless steel, brushed or anthracite metallic
Stone basket insert	Stainless steel, without contact to radiators
Radiator support	Stainless steel
Inner jacket	Stainless steel
Base frame	Stainless steel with integrated drip protection
Furnace connection	integrated, electrical connection screwed downwards
Heating element	1500 watt, extra durable
Heating capacities	6,0 7,5 9,0 kw - 1 circuit 10,5 12,0 kw - 2 circuits
Electrical connection	400V 3n AC
Safety distance	min. 7 cm (up to 10,5 kw), min. 10 cm (12,0 kw) on all sides to combustible parts
Evaporator tank	Chrome-nickel steel, with drain cock 3/8" and dry running protection, container left (standard) or right selectable
Evaporator capacity	1500 w - 230v 1n AC
Evaporator capacity	approx. 5 liters
Steam output	approx. 2,4 kg/h
Stone filling	approx. 25 kg
Net kiln weight	approx. 36 kg
