

Description

Steam generators for the Turkish bath from EcoFlame are indisputable quality and trouble-free operation. Having been on the market for a long time, the EcoFlame brand continues to delight vaporizer lovers with new offers. Today it is EcoFlame KSA120 (12 kW) - a steam generator designed for small hammams (from 10 to 16 cubic meters). This is an excellent solution for arranging a home Turkish bath. Thanks to high-quality parts and elements, the equipment is able to withstand long-term loads and continue to work flawlessly in the proposed conditions, which makes this hammam steam generator an excellent solution for equipping a commercial steam room.

Management and fine-tuning of the steam generator is carried out by a special remote control. The steam generator for the Turkish sauna does not require much effort during installation. It can be installed in any technical room with the required volume. You can buy a steam generator for a Turkish bath in our online store. A large assortment of products will allow you to buy not only equipment for a bath or sauna, but also the necessary accessories.
