

Description

EcoFlame KSA90 is a modern steam generator designed to provide steam for the Turkish bath. The EcoFlame steam generator has won the trust of thousands of steam lovers, having demonstrated reliability, safety, quality and many other positive properties of the equipment. The steam generator is assembled from the best wear-resistant components, thanks to which the service life exceeds 10 years.

This model has a power of 9 kW, which is enough to fully heat and provide steam to a room of 8-12 cubic meters. The steam generator for the hammam is controlled by a special remote control that allows precise settings of the equipment: time, temperature, and others. The remote control also allows you to control the lighting in the hammam. The steam generator for the Turkish bath is very easy to install. Thanks to reliable "stuffing", it can withstand any load. When buying this model, you get a set of nozzles for dispersing steam and an electromagnetic valve for cleaning the tank. Here you will find a lot of sauna and bath equipment that comes with an official manufacturer's warranty.
