

Type TM48-S

Premium sauna heater thermos tm48-s - Ewald Lang

The exclusive premium sauna heater line thermos Superior from Ewald Lang combines the attributes of **Design and power** like no other sauna heater model.

As high-performance electric sauna heaters with a timeless, slim design body, thermos heaters are perfect for modern Finnish home or business saunas.

especially in sauna cabins with large glass surfaces, the Lang electric heater functions as a timeless eye-catcher - thanks to its practical, **narrow footprint** it is suitable for both small private saunas (from 5 m³) and medium-sized professional cabins (up to 24 m³). The four visible sides allow free placement in the room - even as a centerpiece.

The Superior models are available in **Metallic** Design in anthracite, stainless steel and white - unique in the entire sauna sector. In addition, the front side has been given a stainless steel **Application strip** which adds an eye-catching contrast to the unique look. The front strip can be individually provided with advertising labels or similar.

Ewald Lang's tried and tested thermos-Superior sauna heaters are particularly impressive due to their extremely short heating-up time and very quiet heating-up. This results in a very **environmentally friendly** and **economical** operation.

Optional equipment - thermos-S sauna heaters can be expanded in many ways:

- Granite grid - support in stainless steel: sawn granite strips (4 pieces) placed above the stone basket with a fracture-rough surface
- Stove railing made of wood - all 4 sides are possible, bracket angles made of stainless steel
- Cable cover in chrome steel

technical data - sauna heater tm48-s by Ewald Lang

	thermos - type tm 48-S
Dimensions w x d x h	48 x 38 x 82 cm
Outer casing	Stainless steel - polished anthracite metallic glaze white gloss glaze
Head frame	Stainless steel - brushed or Anthracite Metallic
Stone basket insert	Stainless steel, without contact to radiators
Radiator support	Stainless steel
Inner jacket	Stainless steel
Base frame	Stainless steel with integrated drip protection
Furnace connection	integrated, electrical connection screwed downwards
Heating element	1500 watt, especially long-lasting
Heating capacities	6,0 7,5 9,0 kW - 1 circuit 10,5 12,0 15,0 kW - 2 circuits
Electrical connection	400V 3n AC
Safety distance	min. 7 cm (up to 10,5 kW), min. 10 cm (from 12,0 kW) on all sides to combustible parts
Stone filling	approx. 35 kg
Net weight of furnace	approx. 30 kg
